

ENVIDA AI Technologies Limited – Whitepaper

Vision & Mission

At Envida, we believe in democratizing access to smart investments. Our mission is to create a transparent, secure, and high-performing platform for everyday investors and professionals alike. By bridging real-world assets with blockchain technology, we unlock a new era of global, decentralized wealth management.

Executive Summary

ENVIDA AI Technologies Limited is a Cyprus-registered investment and technology company (Reg. No. HE472196), founded by Mr. Tjebbe Arnoud Diederik De Groot. The company is building a full-scale investment ecosystem centered around trust, innovation, and real-world results. Through smart contract integration, real asset exposure, and Web3 architecture, Envida provides a reliable and scalable platform for international investors.

Company Overview

Operating at the intersection of blockchain finance and traditional investment strategies, Envida offers unique opportunities for passive and active wealth generation. Our core services include algorithmic trading, trust-managed deposits, real-world asset (RWA) investment access, and startup acceleration via Envida World Bridge. We aim to serve individuals, teams, and institutions looking for secure, modern alternatives to legacy finance.

Business Model

- EVA trust-based deposits via API-controlled wallets
- Real-world asset participation (real estate, agriculture, logistics)
- Quantitative crypto trading strategies
- Community-led startup investing via Envida World Bridge
- Structured referral and leadership reward system

Investment Products

1. EVA Deposits — Investors retain full control over their capital through smart contracts linked to Trust Wallet. Funds are used in secure trading environments with monthly performance reporting.
2. RWA Investments — Real estate in Turkey, export agriculture in Georgia, and container logistics are among the vetted projects available through Envida's curated RWA platform.
3. Startup Ventures — Through World Bridge, vetted community members can propose, fund, and scale high-potential regional businesses.

Technology & Security

Envida employs secure Web3 authentication, Trust Wallet API integrations, and advanced blockchain-based access control. This zero-custody approach ensures that investors maintain full sovereignty over their funds. Smart contracts, encrypted communication, and verifiable analytics create an environment of confidence and integrity.

Legal & Compliance

- Company Name: ENVIDA AI Technologies Limited
- Jurisdiction: Cyprus
- Registration No.: HE472196
- AML/KYC: Policies based on European compliance frameworks
- Licensing: Applications in progress for investment services, VASP recognition, and international coverage

- Insurance: Professional indemnity coverage under review to support investor security

Risk Factors

All investments carry inherent risks. Envida applies strict risk management procedures:

- Investor funds are never held in company custody
- Exposure is diversified across products and sectors
- No use of leverage or margin trading
- Real-time reporting enhances visibility and accountability

Roadmap – Envida Infinity

- Q1 2025: Launch of EVA deposit platform and global onboarding
- Q3 2025: Launch of Envida RWA Portal with verified opportunities
- Q4 2025: Formation of Envida Council (strategic governance body)
- 2026: Envida Card release, launch of WorldBridge MVP
- 2027: Envida DAO Gateway and decentralized fund management framework

Financial Foundation & Strategic Fund

Envida operates a dedicated internal Strategic Development Fund which serves as the financial backbone for the company's growth, innovation, and global positioning.

The fund is capitalized with a declared statutory capital of €5,000,000 (Five Million Euros). These funds are reserved and committed to:

- Technological development and platform security
- Marketing and global expansion efforts
- Licensing, insurance, and legal structuring
- R&D and partner ecosystem support

This fund ensures that Envida can scale rapidly without dependency on investor deposits, maintaining a strong separation between operational infrastructure and client capital. It reflects our long-term vision and financial stability.

Closing Statement

Envida represents a next-generation financial platform that empowers individuals with the tools and infrastructure once reserved for elite institutions. With our eyes on the future, we're building a world where blockchain meets real economy, and where your portfolio works smarter — globally.
